

Business Technology Solutions: Data Engineer - DBT

Impact where it matters.

ZS is a place where passion changes lives. As a management consulting and technology firm focused on improving life and how we live it, we transform ideas into impact by **bringing together data, science, technology and human ingenuity** to deliver better outcomes for all.

Here you'll work side-by-side with a powerful collective of thinkers and experts shaping life-changing solutions for patients, caregivers and consumers, worldwide. ZSers drive impact by bringing a **client-first mentality** to each and every engagement. We partner collaboratively with our clients to develop custom solutions and technology products that create value and deliver company results across critical areas of their business. Bring your curiosity for learning, bold ideas, courage and passion to drive life-changing impact to ZS.

Where
passion
changes
lives

**We're big
enough
to make an
impact,
small enough
for you to feel
at home.**

13,000+

Passionately committed people
helping clients win and grow

1,700+

Clients in 170+ countries
across industries

35+

Offices worldwide
in 17 countries

We help clients across industries

Pharmaceuticals
& Biotechnology

High-Tech

Travel & Hospitality

Retail

Medical Devices

Health Plans & Providers

Consumer Products

Financial Services

BTS: Data Engineer - DBT

What you'll do

- Design, develop, and maintain **analytics engineering solutions using dbt** across the full transformation lifecycle.
- Translate **business and analytical requirements into scalable data models and transformation logic** within modern cloud data platforms.
- Build and maintain **dbt models, macros, and reusable transformation frameworks** using Jinja templating.
- Recommend and implement appropriate **dbt materializations** (incremental, snapshot, view, table, ephemeral) based on data usage patterns, query performance, and analytical architecture requirements.
- Design and implement **data models following established methodologies** such as Dimensional Modeling (Kimball) and Data Vault to support scalable analytical workloads.
- Develop and maintain **end-to-end transformation pipelines** including staging, intermediate, and mart layers.
- Implement **data quality and observability frameworks**, including generic and singular dbt tests and monitoring practices.
- Leverage **dbt ecosystem packages** such as dbt-utils, dbt-expectations, Elementary, and other relevant packages to improve development efficiency and observability.
- Optimize **warehouse queries, incremental models, and transformation performance** across large-scale datasets.
- Integrate dbt workflows with **orchestration platforms such as Airflow** and participate in broader data platform workflows.
- Follow **CI/CD best practices for dbt deployments**, including automated testing, environment promotion, and version control workflows.
- Maintain **dbt documentation, metadata, and lineage** to ensure transparency and governance across the analytics layer.
- Collaborate with **data engineers, analytics engineers, platform teams, and business stakeholders** to design reliable analytical data models.
- Troubleshoot and resolve **data quality, transformation logic, and pipeline reliability issues** in enterprise data environments.
- Contribute to **technical documentation, knowledge sharing, and mentoring junior team members**.
- Continuously improve analytics engineering standards by promoting **modular model design, reusable transformations, and scalable data pipelines**.

What you'll bring

- **3+ years of hands-on experience working with dbt** in analytics engineering or data engineering roles.
- Experience working with **dbt Core and dbt Cloud environments**.
- Strong expertise in **SQL and data modeling concepts**, including dimensional modeling and analytical data warehouse design.
- Solid understanding of **data modeling methodologies such as Dimensional Modeling (Kimball) and Data Vault**.
- Strong experience in **Jinja templating and dbt macro development**, with the ability to design reusable transformation logic.
- Hands-on experience recommending and implementing **appropriate dbt materializations** based on performance and analytical requirements.
- Experience implementing **data quality and testing strategies** using dbt generic tests, singular tests, and schema validation.
- Familiarity with **dbt ecosystem packages** such as dbt-utils, dbt-expectations, Elementary, or other observability frameworks.
- Experience building and maintaining **end-to-end transformation pipelines in enterprise data environments**.
- Solid understanding of **Git-based version control workflows** and collaborative development practices.
- Experience implementing or working with **CI/CD pipelines for dbt deployments** and automated testing frameworks.
- Experience optimizing **query performance, incremental models, and transformation workloads** on large-scale data warehouses.
- Exposure to **modern cloud data platforms**, particularly **AWS environments, Redshift, and related ecosystem tools**.
- Experience integrating dbt with **workflow orchestration frameworks such as Airflow**.
- Familiarity with **data governance practices including documentation, lineage tracking, and model contracts**.
- Strong **analytical and problem-solving skills** with the ability to diagnose recurring data transformation and quality issues.
- Excellent **communication and collaboration skills**, with experience working in cross-functional and distributed teams.

A great place to work
**We earn multiple workplace
awards each year**

award list**

Hybrid working model

ZS is committed to a **Flexible and Connected** way of working. ZSers are on-site at clients or ZS offices three days a week. Combined flexibility to work remotely two days a week is also available. The magic of ZS culture and innovation thrives in both planned and spontaneous face-to-face connections.

How you'll grow

- Cross-functional skills development & custom learning pathways
- Milestone training programs aligned to career progression opportunities
- Internal mobility paths that empower growth via s-curves, individual contribution and role expansions

Benefits

ZS is committed to supporting all aspects of your wellbeing, including your **health**, **financial** and **personal** wellbeing.

Our **health** benefits allow you to prioritize your physical and mental wellbeing with:

- **Health insurance, including hospitalization & fertility benefits**
- Up to 5 dependents eligible for health insurance, including parents
- Outpatient department (OPD) coverage including general physician, vision, dental up to 5,000 INR and one annual health checkup for self & spouse up to 5,000 INR In house doctor
- Mental health support & wellness coaching
- Emergency support, including life, critical illness, & accident insurance

In addition to competitive salaries and bonus opportunities, additional **financial** benefits include:

- **Provident fund & national pension scheme**
- Financial education & resources
- Gratuity benefits
- Allowances, including broadband, meals, & transportation
- Donation matching
- Advanced degree sponsorship

Personal wellbeing is as important as your professional opportunity. We offer:

- Paid holidays
- 25 days of paid vacation annually
- Leaves of absence, including family & bereavement leave
- Life coaching, including parental leave coaching & parenting resources
- Daycare facilities

At ZS, we aim to nurture an inclusive and high-performing culture where every individual feels valued, respected and empowered—and can flourish. [Learn more](#) about inclusion and belonging efforts and the ways we foster community through education, leadership programs, networking and our employee-led groups.

ZS is an equal opportunity employer and is committed to providing equal employment and advancement opportunities without regard to any class protected by applicable law.

To complete your application:

Candidates must possess or be able to obtain work authorization for their intended country of employment.
